

Define your CATIA skills

AscendBridge: CATIA V5 Functional Tolerancing & Annotations

OBJECTIVE: This course will teach you how to annotate a 3D part. You will learn how to create annotation planes and how to add and manage 3D annotations on these planes.

You will also learn how to create 3D views and use them to create 2D drawing views.

Price per Student	Corporate Pricing	
Duration: 2 Days	Student Profile: CATIA V5 Users	Pre-requisites: None
TOPIC	DETAILS	TOPIC DURATION
Introduction to FT &A	<ul style="list-style-type: none"> Why do we need Geometrical Tolerances and Annotations How to Generate Annotations Basic Concepts of FTA Unique Tolerancing Channel Getting Familiar With FTA Workbench 	0.25
The Tolerancing Advisor	<ul style="list-style-type: none"> What is Tolerancing Advisor Different ISO Standards Rules Creating Datums Creating Semantic Annotations N Elements Tolerancing Creating Non-Semantic Annotations Creating Framed Dimensions 	.50
Creating & Managing FTA Annotations	<ul style="list-style-type: none"> Creating View/Annotation Planes Aligned Section Views and Section Cuts Offset Section view I Section Cut Editing and Managing Annotations Managing Captures Generating Check Report 	.50
